VAN DYKE'S
PATENT ORE ROASTER.

THE undersigned, patentee of this valuable improvement in the manufacture of iron, respectfully informs the public that he has made arrangements to furnish to Farmers and others, the Patent Ore Roaster. It has been in successful operation at Racoon, Tenn., and in Buffalo, N.Y., in Greenup county, Ky. The great advantages which this improvement presents is not only a saving of at least 40 per cent in coal, but a great improvement in the quality of the iron, and the work of the furnace. I submit the following certificates from Farmers above named.

KINGSTOWN, TENN., June 14, 1890.
This is to certify that we have been using on a new heat for about 20 days, A. C. Van Dyke's Patent Ore Roaster, and have been using very seldom over seven loads (200 bushels) coal, and have been making regularly from 10 to 11 tons of better iron than we have ever made heretofore. I am well satisfied that it has improved the quality of our iron and that it is an excellent firing process and a saving in charcoal. Respectfully,
for Wm. Spalding & Co.
